### Political Chiefs See Boost For Subsidy Bill in Daugherty's Decree.

Attorney General Daugherty in a weeping decision yesterday ruled liquor off American ships throughout the world and prohibited the entrance into American waters of foreign ships carrying liquor, sealed or open.

The decision forces Chairman Lasker of the Shipping Board to discontinue the sale of liquor on all government ships, outside the territorial limits of the United States, prevents to New York when the two avia-the carrying of liquor anywhere in the tors hopped off in their Fokker monoplane at 5:53 Thursday mornworld by any privately owned ships flying the American flag, and bars American ports to the ships of any nation, unless their liquor stores are disposed of before they enter the ter-ritorial waters of this country.

### Reverses Former Ruling.

The Attorney General's decision, which has been hanging fire for many months, reverses the ruling of the former counsel for the United States Shipping Board, Elmer Schlessinger, of Chicago, and is predicated on decisions of the United States Supreme Court in several cases. There will be no difficulty encoun-

tered with respect to enforcement of the law as it relates to American ships, but the decision is certain to precipitate international complicaions with the big maritime nations

Already, the Attorney General understands, foreign shipping in-terests are prepared to fight in the courts and they will apply for a temporary Federal injunction re-straining the enforcement of the ruling against them until its valid-ity can be tested in the courts. This course may operate to prevent the immed ate holding up of the trans-Atlantic liners which daily enter American ports from Europe and South America and the Pacific fleets from Asiatic waters flying the flags of fore gn
